

## PRIME VISION GREY

### HIGH CONTRAST FIXED FRAME PROJECTION SCREEN

EPV Screens' **Prime Vision Grey** is a fixed frame screen featuring our ChromaGrey front projection material. The screen surface is a matte gray color that enhances contrast levels in projected imagery. The Prime Vision Grey is a great match for dedicated home theaters in need of sharper black levels and more defined contrast. It has a split-frame 6 pc design in a 2.4" wide hand-wrapped velvet covered aluminum frame. This design reduces shipping costs and allows installers to easily carry it through close quarters many job sites have.

MODEL	DIAGONAL	ASPECT RATIO	VIEW HEIGHT	VIEW WIDTH	MATERIAL	GAIN	FRAME WIDTH
SE100H2	100"	16:9	48.8 in	87.0 in	ChromaGrey	1.0	2.4 in
SE120H2	120"	16:9	58.7 in	104.7 in	ChromaGrey	1.0	2.4 in
SE135H2	135"	16:9	66.1 in	117.7 in	ChromaGrey	1.0	2.4 in

#### FEATURES & BENEFITS

- ChromaGrey high-contrast front projection material with 1.0 Gain reflectivity
- 180° wide viewing angle has optimal uniform diffusion for superior on or off-axis performance
- Black backing eliminates light penetration which will enhance picture brightness
- 4K/8K Ultra HD
- Available in diagonal sizes: 100"/120"/135" in 16:9 aspect ratio

#### DESIGN & INSTALLATION

- 2.4" wide aluminum frame wrapped velveteen surface provides an elegant finish while absorbing projector overshoot
- Sliding wall brackets ensure perfect horizontal alignment for a properly centered installation
- Lightweight split-frame design is cost effective for shipping and provides easy access to install sites
- Assembles and installs in minutes
- Push clips design fasten material to frame to create tension uniformity for a flat projection surface
